

IIEC Program on Passenger Interdiction Techniques, Trade Facilitation and IT Systems

02 Weeks (06th July 2026 to 17th July 2026)

About the Course:

Passenger channels remain a significant vector for cross-border smuggling of narcotics, currency, wildlife products and other prohibited goods. This programme is designed to strengthen the operational capabilities of officers engaged in passenger control and border enforcement.

The course will focus on intelligence-led passenger profiling, behavioural indicators, and identification of emerging concealment methods. Participants will examine how routine passenger movements can present enforcement risks and how targeted interventions can be undertaken without disrupting legitimate travel.

The programme also highlights the importance of inter-agency coordination among Customs, police, immigration and intelligence agencies in addressing transnational smuggling networks.

Delivered through case-based discussions and practical scenarios, the course emphasises application in real-world operational environments. It is suitable for officers involved in passenger clearance, preventive operations and border enforcement.

Who should Apply:

Mid- to senior-level officers from Customs, Police, Immigration, and related agencies involved in border enforcement, passenger clearance, or investigations; preferably in supervisory/operational roles, with a degree, 3-5 years' experience, and working proficiency in English.

Study Tour:

A day-long study tour to Kempegowda International Airport, Bengaluru offers participants hands-on exposure to real-time Customs operations, enhancing their practical understanding of passenger Interdiction, surveillance, and inter-agency coordination-key to achieving the Course's enforcement and facilitation objectives.
