- (d) Selection Criteria: As per the method of Selection of Individual Consultant as detailed in this Request for Application.

Background and general descriptions:

The National Board of Revenue (NBR) created a separate Bond Commissionerate in 2000 to administer the bonded warehouse facilities offered to the export oriented industries, selected home consumption bonded industries, diplomatic bond etc. The main reason for offering this bonded warehouse facility was to provide liquidity support to these export oriented industries. As the volume of businesses expanded considerably over the years, in 2011 the Bond Commissionerate was split into two – Dhaka and Chittagong. Administrative functions of Bond Commissionerate are:

- A. Issue and manage bonded warehouse license
- B. Facilitate the export oriented businesses
- C. Ensure proper collection of revenue
- D. Control misuse of bond facilities through risk management
- E. Maintain database of bonded warehouses

Generally, NBR offers bonded warehouse facilities to the exporters who import duty-free raw materials for subsequent export of finished products. However, as the bond operations are closely linked with the growth of local industries, any pilferage or misuse of this facility would cause serious dent in the growth of local industries and huge loss in government revenue. Current system of manual overseeing and management is causing huge inefficiency in the entire process. These inefficiencies result in higher cost of doing businesses for the export-oriented industries, which need to remain very competitive in the international market where they operate. Besides, a section of unscrupulous businesses are also taking full advantage of manual operating system of Bond Commissionerates. Therefore the entire bond management must be automated to enable Bond Commissionerates to provide more efficient services to the deserving bond licensees while effectively control its misuse.

Strategic Objects

- A. Review the existing business process and legal framework and development of legal frameworks and related business processes conducive for an automated environment;

- B. Procurements of IT systems and related hardware including data center;
- C. Establishment of IT enabled Environment & Project Implementation Unit (PIU) setup and operations;
- D. Integration with other systems (ASYCUDA, IVAS, Banks etc.);
- E. Redesigning Bond Administration in the line with newly developed functions;
- F. Capacity Building (Training & Change management programs); and
- G. Stakeholders' awareness and training.

Objectives of the Services required

Scope of the Services required (duties and responsibility)

Procurement Specialist will have to ensure financial safeguards through sound procurement procedure for facilitating smooth implementation of the project activities. The service includes but not limited to:

- a. Prepare an overall procurement plan for all goods, works and services to be procured during the project period;
